The idea

GRE vocabulary punishes approximate knowledge. Here every option is a near-synonym of the answer; only one matches the exact nuance the sentence builds.

What exact shade of meaning does the sentence build — deliberate or accidental, willful or impersonal, a state or an action, praising or faulting?

Predict the nuance in your own words before reading options; since all five are near-synonyms, eliminate by nuance, sense, register, and direction.

Watch every step

Once the first café opened downtown, imitators appeared on every corner within a year, each new shop seeming to spawn two more.

Which word best captures the quality the sentence describes?

A. burgeon ✗ *near-synonym, imprecise nuance*

B. ubiquitous ✗ *wrong-sense word*

C. proliferate

D. lucrative ✗ *wrong connotation/register*

E. dwindle ✗ *antonym/contradicts context*

Why C — "proliferate." Select the one word whose nuance matches the prediction exactly.

Now a harder one

Though she privately objected to the new policy, she raised no protest and simply went along with the majority in order to avoid a fight.

Which word best captures the quality the sentence describes?

A. concede ✗ *near-synonym, imprecise nuance*

B. concur ✗ *wrong-sense word*

C. condone ✗ *wrong connotation/register*

D. resist ✗ *antonym/contradicts context*

E. acquiesce

Why E — "acquiesce." Select the one word whose nuance matches the prediction exactly.

The method, in one line

Vocabulary in context: precision among near-synonyms, set 4

Predict the nuance in your own words before reading options; since all five are near-synonyms, eliminate by nuance, sense, register, and direction.

Would a second option 'sort of' work? Name what rules it out. The answer is the one you can defend against its nearest rival.

Watch out: two traps to dodge

⚠ near-synonym, imprecise nuance

Selects a true synonym whose nuance (willfulness, scope, or emphasis) misfits the context.

⚠ wrong-sense word

Selects a word whose alternate sense (state vs action, literal vs figurative) does not match the context.

Name the trap before you pick — most wrong answers are one of these two.

Try it, then watch the walk-through
