Words in context: high-frequency vocabulary, set 27

This node drills high-frequency SAT vocabulary using the words-in-context method…

Lesson `rw.vocab.V27`

The idea

This node drills high-frequency SAT vocabulary using the words-in-context method: read the meaning the sentence builds, predict the intended word, then choose the option that matches it exactly. Wrong choices are imprecise, use a different sense, carry the wrong connotation, or contradict the context.

What precise meaning does the sentence build for the blank? Look for a contrast, a restatement, an example, or a tone.

Predict a word from context BEFORE reading the options, then test each for precise meaning, correct sense, matching connotation, and consistency.

Watch every step

The new laptop is far lighter ___ the old model, making it much easier to carry to class.

Which choice completes the text with the most logical and precise word?

- **A.** than
- **B.** then ✗ *wrong-sense word*
- **C.** that ✗ *imprecise/loosely-related word*
- **D.** well ✗ *contradicts-context word*

Why **A** — "than." Choose the option that matches the prediction most exactly.

Now a harder one

The twins always kept ___ backpacks color-coded so no one would mix them up at pickup.

Which choice completes the text with the most logical and precise word?

A. there ✗ *wrong-sense word*

B. their

C. they're ✗ *imprecise/loosely-related word*

D. his ✗ *contradicts-context word*

Why **B** — "their." Choose the option that matches the prediction most exactly.

The method, in one line

Words in context: high-frequency vocabulary, set 27

Predict a word from context BEFORE reading the options, then test each for precise meaning, correct sense, matching connotation, and consistency.

Is it precise, not just close? Right sense? Right connotation? Consistent with the context?

Watch out: two traps to dodge

⚠ imprecise/loosely-related word

Selects a word in the right general area but not the precise meaning the sentence builds.

⚠ wrong-sense word

Selects a word whose alternate sense does not match the meaning the context requires.

Name the trap before you pick — most wrong answers are one of these two.

Try it, then watch the walk-through
